

This UI Base Plan for **Clox** is structured to reflect the "Safety-First" architecture, the multi-tier administrative hierarchy, and the Request for Proposal (RFP) model.

The design should prioritise **high-contrast data points** (for drivers in bright sunlight) and **clear logic gates** (locking features until safety/compliance steps are met).

1. Sender (Customer) App UI Plan

Objective: Simplify complex freight specifications into a guided "RFP" creation flow.

- **Screen 1: Onboarding Entry**
 - Toggle Switch: vs [Personal/Individual].
 - *Business*: ABN/ACN entry field (auto-verified via easyAML).
 - *Individual*: Camera module for Driver's License/Passport scan.
- **Screen 2: The Freight "Quick-Post" (Step 1 of 3)**
 - **Job Type Selection**: [Interstate - Per KM] or [Local - Hourly (4hr min)].
 - **Multi-Pickup Widget (Hourly only)**: "Add Stop" button (max 4 stops).
 - **Scheduling**: Interactive calendar with available time slots.
- **Screen 3: Load Specs & Site Assessment (Step 2 of 3)**
 - **Checkboxes**: General, DG, Liquid, Oversize, Steel, Temp Controlled, etc.
 - **DG Alert**: If weight > 1,000\text{kg} + DG selected, the mandatory "Upload DG Manifest" file picker appears.
 - **Site Access & Maneuverability Assessment**:
 - Dropdowns: Turning Circle (Tight, Standard, Wide Yard).
 - Facility Specs: Raised Dock (48-52"), Ground Level, or Forklift Required.
- **Screen 4: Budget & Proposal Review**
 - **Proposed Budget Field**: Error message if value < Super Admin Minimum Base Rate.
 - **RFP Comparison View**: Side-by-side cards showing:
 - *Driver*: Rating stars, years of experience, profile photo.
 - *Vehicle*: Class, Rego, RWC status.
 - *ETA*: Traffic-aware arrival time to pickup.
- **Screen 5: Active Tracking (Post-Mass Check only)**
 - Live map with "15-min away" travel-time geofence.
 - Wait Time Timer: Visual countdown of 30 free minutes at pickup.

2. Transportation Company App/Web UI Plan

Objective: Maximise fleet utilisation and provide clear "Net Profit" visibility.

- **Screen 1: Compliance Vault (The Dashboard Gate)**
 - Status badges for ABN, Public Liability, Transit Insurance, and Vehicle RWCs.
 - *Logic:* Dashboard is greyed out/locked if any badge is RED (Expired/Missing).
- **Screen 2: Smart Job Board**
 - **Net Payout Display:** Every job card highlights the **Net 70% amount** (after 30% commission).
 - **Filters:** Class (3T, Semi, etc.), Region (City/State), and specialised permits.
- **Screen 3: RFP Submission & Asset Allocation**
 - **The Allocation Gate:** Bidding is disabled until a specific Truck + Driver are selected from the registered fleet.
 - **Site Suitability Review:** Prominent display of Sender's "Truck Entry Room" notes.
- **Screen 4: Fleet+ Analytics (SaaS Subscription Tier)**
 - **Profit Engine Widget:** Real-time charts showing "Profit per Vehicle" (Net - Fuel/Wages/Maintenance).
 - **Maintenance Watchdog:** Status indicator for each truck showing the distance until the next service.
- **Screen 5: Financial Wallet**
 - Pending vs. Available balance.
 - "Withdraw" button (active 7 days post-POD).

3. Driver App UI Plan (Mobile-First)

Objective: Hand-free operation focus and strict safety compliance gates.

- **Screen 1: Shift Start / Task View**
 - Trip Summary: Pickup ETA and Site Access instructions.
- **Screen 2: Gate A - Pre-Trip Checklist**
 - Interactive checklist (Tyres, Brakes, Lights, Fluids).
 - Safety Declaration: "I am fit to drive and have rested 7+ hours."
- **Screen 3: Pickup Sequence & Gate B (Mass Check)**
 - **Mass Verification Form:** Driver enters actual dead weight.
 - **"Report Discrepancy" Button:** Triggers camera and manual entry for surcharging.
 - **THE MASTER LOCK:** Large "START TRIP" button is disabled (Grey) until Mass Verification is SUBMITTED.
- **Screen 4: Transit Mode**
 - Large-font ETA and navigation toggle.
 - "Taking Break" Button: Pauses tracking and notifies Sender/Admin.
- **Screen 5: Completion & POD**
 - Sign-on-Glass (SOG) signature pad.
 - Mandatory Photo Module: "Photo of Goods Offloaded."

4. Admin UI Plan (Super, Master, Local BDE)

Objective: Market governance and automated commission management.

- **Super Admin View:**
 - Global Pricing Configurator: Set base rates per KM/Hour.
 - Commission & Marketing Fee deduction sliders.
- **State Master View:**
 - Regional Compliance Audit dashboard.
 - RWC/Insurance expiry alerts for carriers in their jurisdiction.
- **Local BDE View:**
 - BDE-specific leaderboard: Onboarded carriers vs. active senders.
 - "Net Commission" tracker for the **4th night payout** cycle.

5. Consolidated UI/UX Logic Rules for Developers

- **The "4,000 Rule":** Volumetric weight calculation must be hardcoded into the Sender's item input screen.
- **Colour Logic:**
 - **GREEN:** Safe, On-Time, Verified.
 - **YELLOW:** Extra capacity, approaching break, document expiring soon.
 - **RED:** Risk of overload, Mass Breach, Document Expired (Locked state).
- **Timestamping:** All POD, Signature, and Arrival events must use **Server-Side NTP time**, not the phone system clock, to prevent fraud. [1, 2]
