

App Workflows by All User Role

A. Super Admin Workflow

1. **Configuration:** Set minimum base fares and platform commission rates (30%).
2. **Compliance Audit:** Review uploaded documents. Automated system flags RWCs and ABNs nearing expiration.
3. **Liquidated Damages:** Review and approve/deny claims for late cancellations or substantial detention.

B. Sender (Customer) Workflow: Business vs. Individual

1. **Onboarding:** Register via OTP login.
 - **Business Branch:** Mandatory ABN/ACN entry; verified via **3rd party API**.
 - **Individual Branch:** Mandatory Driver's License or Passport scan; verified via **3rd party API**.
2. **Request Creation:** Input pickup/drop locations using **Google Maps Platform**.
3. **Job Selection:** Choose "Per KM" (Interstate) or "**Hourly**" (Local - mandatory minimum 4 hours). ***base rate setup by super admin.**
4. **Freight type (cartons / pallets / machinery / loose)**
5. **Chargeable Weight Input:** Mandatory dead weight (kg) and dimensions (L x W x H).
6. **Choose load type Use simple checkboxes:**
 - ☐ General Freight
 - ☐ Dangerous Goods
 - ☐ Liquid / Bulk Liquid
 - ☐ Oversize / Over-dimension
 - ☐ Steel / Metal
 - ☐ Temperature Controlled
 - ☐ Machinery / Heavy
 - ☐ Vehicles / Plant
 - ☐ Containers
 - ☐ Timber / Building Materials
 - ☐ High-Value / Sensitive
 - ☐ Waste / Recycling

if they choose DG Load (Danger Good) must select Class and weight if weight above 1000kg must upload Dg Document.

SMART RULES FOR CLOX (AUTO-LOGIC)

If customer selects	System action
Dangerous Goods	Only DG-approved carriers
Oversize	Permit warning + flatbed only
Liquid	Spill containment check
Steel	Chain & restraint confirmation
Reefer	Temp range mandatory
Container	Wharf access check

7. **Pick up** date and time on calendars.

8. Special requirements:

- ☐ Tailgate
- ☐ Forklift on site
- ☐ Refrigerated
- ☐ Crane (Hiab)
- ☐ Time-critical

System Vehicle Recommendation (Auto)

Cloxx system:

- Calculates minimum required vehicle
- Shows recommended vehicle types
 - Example: *“Large Van or 3-Tonne Truck”*

Sender sees:

-  Recommended vehicle
-  Vehicles too small are disabled
-  Larger vehicles allowed (with higher cost)

9.  Important: Sender selects requirement, not a specific truck or driver.

Price Visibility

Sender sees:

- Price ranges per vehicle type
 - ETA
 - Capacity suitability indicator:
 -  Perfect fit
 -  Extra space
 -  Risk of overload (blocked)
10. **Pricing:** Submit a bid. The system enforces a validation rule: **The bid amount cannot be lower than the minimum base price set by the Super Admin.**
 11. **Post proposal** job broadcast online.
 12. **Proposal Review:** Review from the transport company side. The review screen must display:(masking transport company info)
 - **Driver Details:** Profile photo, rating, and years of experience.
 - **Vehicle Details:** Vehicle type and registration number.
 - **Operational Details:** Estimated Arrival Time (ETA) to the pickup point.
 - **Insurances and certificates**
 13. **100% Upfront Payment:** Accept proposal and pay 100% of the agreed fare upfront via **Stripe Connect.**
 14. **Active Monitoring:** Monitor the trip through real-time GPS tracking on an integrated map.
 15. **Finalization:** Automatically receive the digital **Proof of Delivery (POD)** and **Tax Invoice** include **GST** upon trip completion.

C. Transportation Company Workflow

Access is locked behind a mandatory compliance gate.

1. **Pre-Registration Compliance Gate:** Mandatory upload of **ABN/ACN**, **Public Liability**, and **Transit/Cargo** insurance. verified via **3rd party API**
2. **Fleet Registration:** Add vehicles with tare weight, GVM/GCM, and upload **Roadworthy Certificates (RWC)**. verified via **3rd party API**
3. **Upload all compliance documents, all insurances, all Permits**
4. **Receive Jobs Broadcast:** Real-time notifications for new freight requests in the carrier's service area.

System validation:

-  Blocks undersized vehicles
-  Blocks licence mismatch
-  Warns if tight capacity

Smart Conflict Handling

If carrier:

- **Proposes a larger vehicle → Not Allowed (price adjusts)**
 - **Proposes a smaller vehicle → Blocked**
 - **Proposes same truck for multiple jobs:**
 - **Once one job is awarded → others auto-expire**
 - **Carrier notified instantly**
5. **Proposal Accept and Submission: (masking customers info)**
 - **Assignment:** Assign a specific verified vehicle and driver to the load.
 - **Net Display:** The app displays the **Net Payout** (70%) to the carrier, not the gross fare paid by the sender.
 6. **Total Balance:** up to date.
 7. **Settlement:** Withdraw 70% payout after the 7-day clearing period.

D. Driver Workflow

1. **Received notification job sent by a transport company.**
2. **Authentication:** Secure login via company-provided credentials.
3. **Pre-Trip Checklist:** Mandatory NHVR safety gate (tyres, brakes, lights, fluids, and "Last Rest Period" entry). *A
4. **Manual Logbook:** Driver manages rest breaks via paper diary; no in-app fatigue alerts are triggered in this version .
5. Auto sends notification to all users' pickup location ETA.
6. **Auto Pre Alert** Send notification 15 minutes before reaching destination.
7. **Arrive** Auto sends notification to all users (*start time calculation based on fleet loading offloading window setup by super admin) 30 minutes after change waiting time calculating notifications to all user
8. **Start Load** Auto sends notification to all users.
9. **Pickup Mass Check:** Inspect load and secured with appropriate straps or chains if tap "Report Discrepancy" if exceeds declaration, triggering an automated surcharge to the sender. (including collecting all required document)
10. **Start trip** notification "Start Trip" button enables ONLY after the Mass Check is submitted
11. **Taking Brake** notification
12. **Auto Pre Alert** Send notification 15 minutes before reaching destination. Notifications to all users 60 minutes after start waiting charge.
13. **Start unload** Auto sends notification to all users.
14. **POD Capture:** Geofence triggers arrival timestamp. Capture receiver's **Sign-on-Glass (SOG)** and mandatory goods photos.

Truck Breakdown – Consolidated App Screen Flow

Driver App Flow

- **Screen 1 (Active Trip):** Shows Map, ETA, and a  **Report Issue** button.
- **Screen 2 (Report Issue):** Radio buttons: Truck Breakdown, Accident, Traffic, Other.
- **Screen 3 (Details):** Dropdown (Engine, Tyre, etc.), GPS, Odometer, and mandatory photo upload.
- **Screen 4 (Status):** Status becomes  Breakdown – In Progress. Mandatory Photo/GPS.

Transport Company Flow

- **Screen 5 (Alert):** Instant dashboard notification with Trip ID and Vehicle Rego.
- **Screen 6 (Management):** Resolution options:
 - **Option A: Assign Replacement (Internal):** Assign another company truck.
 - **Option B: Release to Marketplace:** Perform a **Stripe Transfer Reversal** to re-payout a new carrier.
 - **Option C: Repair & Continue:** Enter ETA; validated against legal fatigue limits.

Sender App Flow

- **Screen 7 (Notification):** Push notification of the delay.
- **Screen 8 (Details):** Location and status. If replaced, it shows the **new driver pic, rating, vehicle type, rego, and ETA. must tap Approve or Cancel (Refunds follow ACL rules).**
- **Screen 9 (Outcome):** Sender approves or rejects/requests refund (if delay exceeds ACL "Major Failure" thresholds).

Admin & Completion

- **Screen 10 (Admin Monitoring):** High-level view of all incidents for manual intervention.
- **Screen 11 (Final Trip Completion):** Breakdown recorded in the Company Performance Score.

***A**

Essential Pre-Trip Checklist

Organise your daily walk-around into these critical focus areas:

- **Wheels & Tyres**
 - **Tread Depth:** Minimum 1.5 mm across the entire tread.
 - **Condition:** No deep cuts, bulges, exposed cords, or mismatched sizes.
 - **Security:** Check for missing or loose wheel nuts and signs of rim movement (e.g., rust streaks or "fretting" dust).
- **Brakes & Air Systems**
 - **Functionality:** Test that the service and parking brakes hold the vehicle securely.
 - **Air Leaks:** Listen for audible leaks and ensure air pressure builds up within normal timeframes.
 - **Components:** Visually inspect hoses, lines, and couplings for damage or insecure connections.
- **Lights & Electrical**
 - **Visibility:** Test all headlights (high/low beam), indicators, hazard lights, and brake lights.
 - **Markers:** Ensure clearance lights, number plate lights, and reflectors are clean and functional.
 - **Dashboard:** Confirm all warning lights extinguish after start-up.
- **Engine & Fluid Levels**
 - **Leaks:** Check under the vehicle for fresh oil, fuel, coolant, or hydraulic fluid leaks.
 - **Levels:** Verify engine oil and coolant are within range.
 - **Exhaust:** Inspect for excessive smoke, noise, or leaks.
- **Cabin & Safety Equipment**
 - **Visibility:** Clean windscreen and mirrors; check for cracks that could impair your view.
 - **Safety Gear:** Ensure a fire extinguisher (in-date and secure) and three warning triangles are on board (mandatory for GVM over 12 tonnes).
 - **Seatbelts:** Confirm they are in good condition and function correctly.
- **Load & Couplings**
 - **Restraint:** Confirm the load is stable, distributed correctly, and secured with appropriate

straps or chains.

- **Coupling:** Ensure the turntable or pin is engaged correctly and locked.

Mass Discrepancy Flow

- Step 1: Driver arrives at pickup and identifies weight is higher than declared.
- Step 2: Driver taps "Report Discrepancy" and enters actual weight + photo evidence.
- Step 3: System notifies Sender: "Additional charge of \$X required to proceed due to weight discrepancy."
- Step 4: System performs a Stripe Incremental Authorization.
- Step 5: Upon payment success, the "Start Trip" button is unlocked for the Driver.

Essential Technical Logic for Developers

Labor Compliance: The "Hourly" job engine must default to a 4-hour minimum payment to comply with the Road Transport and Distribution Award 2020.

State Machine: Trip status must follow this strict sequence: SafetyCheck → Arrived_at_Pickup → Loading → Mass_Check_Submitted → Trip_Started. Live tracking to the sender is disabled until Trip_Started.

Fatigue Engine: The in-house EWD must record time in 1-minute increments. It must trigger a broadcast notification to all IDs associated with the trip 15 minutes before a legal rest break is required.

Taxation: Auto-invoicing must include the Sender's Name and Address for any transaction $\geq \$1,000$ to be ATO compliant.

Cubic Formula: Always use the standard Australian road divisor: $\text{Chargeable Weight} = (L \times W \times H \text{ in cm}) / 4,000$.

Consolidated 3rd Party Costs (AUD)

- Stripe Connect: 2.00/acc/mo + 2.9\% + 30\text{c per transaction}.
- easyAML (KYB/KYC): \\$1.00 - \\$3.00 per business/individual verification.
- Radar.com (Geofencing): Free tier; Pro \approx \\$600/mo (for up to 10k users) & Twilio Proxy (Masking): \approx \\$1.15/local\ number/mo + usage.
- Monoova (NPP/Osko): \approx \\$0.50 - \\$1.50 per payout.

Vehicle selection, based pricing and matching logic in Clox app.

Light Vehicles (Local / Express)

1. **Motorbike / Scooter**
 - Payload: up to 30 kg
 - Volume: small satchel
 - Use: documents, urgent parcels
2. **Car / Hatchback / Sedan**
 - Payload: 100 – 200 kg
 - Volume: ~0.5 m³

Use: small parcels, urgent deliveries

Ute (Single Cab)

- Payload: 800 – 1,000 kg
- Tray: ~2.4 m x 1.8 m
- Use: building materials, pallets, machinery

Ute (Dual Cab)

- Payload: 700 – 900 kg
- Use: site deliveries, tools, cartons

Vans (Most Common App Bookings)

5.Small Van (SWB)

- Payload: 800 – 1,000 kg
- Volume: 3 – 4 m³
- Pallets: 1
- Use: cartons, light freight

6.Medium Van (MWB)

- Payload: 1,000 – 1,200 kg
- Volume: 6 – 8 m³
- Pallets: 2
- Use: retail stock, e-commerce

7.Large Van (LWB)

- Payload: 1,200 – 1,500 kg
- Volume: 10 – 14 m³
- Pallets: 3–4
- Use: furniture, bulk cartons

Trucks (Commercial Freight)

8.1–2 Tonne Truck

- Payload: 1,000 – 2,000 kg
- Pallets: 4–6
- Use: metro freight, short haul

9.3 Tonne Truck

- Payload: 3,000 kg
- Pallets: 6–8
- Use: distribution, store deliveries

10.4–6 Tonne Truck

- **Payload: 4,000 – 6,000 kg**
- **Pallets: 10–12**
- **Use: regional freight**

11.8–10 Tonne Truck

- **Payload: 8,000 – 10,000 kg**
- **Pallets: 14–16**
- **Use: interstate, heavy loads**

Rigid & Specialised Trucks

12.

Rigid Truck (12–14 Pallet)

- **Payload: 10 – 12 tonnes**
- **Use: retail, FMCG, warehouses**

13.Tailgate Truck

- **Payload: varies by size**
- **Feature: hydraulic tail lift**
- **Use: no-forklift sites**

14.Refrigerated Truck (Reefer)

- **Payload: 2 – 12 tonnes**
- **Use: food, pharma, cold chain**

15.Flatbed / Tray Truck

- **Payload: 2 – 12 tonnes**
- **Use: steel, timber, machinery**

16.Crane Truck (Hiab)

- Payload: 4 – 12 tonnes
 - Lift: 1–8 tonnes
 - Use: site deliveries, containers
-

Heavy & Linehaul Vehicles

17.Semi-Trailer (Single)

- Payload: 22 – 24 tonnes
- Pallets: 22–24
- Length: 13.6 m
- Use: interstate freight

18.B-Double

- Payload: 34 – 38 tonnes
- Pallets: 34
- Use: long-haul, bulk freight

19.Road Train

- Payload: up to 120 tonnes
- Use: mining, remote transport

Containers (If your app supports ports)

20.

20ft Container

- **Payload: ~28 tonnes**
- **Volume: 33 m³**

21.

40ft Container

- **Payload: ~26 tonnes**
- **Volume: 67 m³**

☒ **Recommended App Filters (Best Practice)**

For Clox Freight Forwarding, include:

- **Vehicle Type**
- **Max Weight (kg)**
- **Pallet Count**
- **Volume (m³)**
- **Special Features (Tailgate, Reefer, Crane)**
- **Licence Class (MR, HR, HC, MC)**
- **Metro / Regional / Interstate**

Australia – Average Vehicle Pricing

Note: Prices vary by city, fuel, demand, and access conditions.

All rates ex-GST unless stated.

Light & Small Vehicles

Motorbike / Scooter

- Per hour: \$45 – \$70
- Per km: \$1.20 – \$1.80
- Use: documents, urgent parcels

Car / Hatchback

- Per hour: \$50 – \$80
- Per km: \$1.40 – \$2.00
- Use: small parcels

Ute (Single / Dual Cab)

- Per hour: \$70 – \$100
- Per km: \$2.00 – \$3.00
- Use: small pallets, site work

Vans (High-Volume App Usage)

Small Van

- Per hour: \$75 – \$95
- Per km: \$2.20 – \$3.00
- Pallets: 1

Medium Van

- Per hour: \$85 – \$110
- Per km: \$2.50 – \$3.50
- Pallets: 2

Large Van (LWB / Hi-Roof)

- Per hour: \$95 – \$130
- Per km: \$2.80 – \$4.00
- Pallets: 3–4

Small to Medium Trucks

1–2 Tonne Truck

- Per hour: \$110 – \$150
- Per km: \$3.50 – \$4.80
- Pallets: 4–6

3 Tonne Truck

- Per hour: \$120 – \$170
- Per km: \$4.00 – \$5.50
- Pallets: 6–8

4–6 Tonne Truck

- Per hour: \$140 – \$200
- Per km: \$4.50 – \$6.50
- Pallets: 10–12

8–10 Tonne Truck

- Per hour: \$170 – \$240
- Per km: \$5.50 – \$8.00
- Pallets: 14–16

Rigid & Specialised Trucks

Rigid Truck (12–14 Pallet)

- Per hour: \$180 – \$260
- Per km: \$6.50 – \$9.00

Tailgate Truck (Add-on)

- Add: +\$10–\$25/hour
- Or: +\$0.30–\$0.60/km

Refrigerated Truck (Reefer)

- Per hour: \$200 – \$300
- Per km: \$7.00 – \$10.00

Crane Truck (Hiab)

- Per hour: \$220 – \$350
- Per km: \$7.50 – \$12.00
- Minimum: 4 hours common

Flatbed / Tray Truck

- Per hour: \$160 – \$240
- Per km: \$6.00 – \$9.00

Linehaul / Interstate

Semi-Trailer

- Per km: \$2.50 – \$4.00 (long haul)
- Per hour (metro): \$180 – \$260

B-Double

- Per km: \$3.50 – \$5.50
- Minimum runs apply

Road Train

- Per km: \$5.00 – \$10.00+
- Special permits required

Containers (Port / Wharf)

20ft Container

- Per hour: \$160 – \$220
- Per km: \$4.00 – \$6.50

40ft Container

- Per hour: \$180 – \$260
- Per km: \$5.00 – \$8.00

Specialised Full Load Vehicles

Refrigerated Truck (FTL)

- Add: +20–35% on base rate

Tailgate

- Add: \$100 – \$250 per job

Crane Truck (Hiab)

- Minimum: \$900 – \$1,400

- Hourly: \$250 – \$350
- Minimum: 4 hours

ADD-ON CHARGES

Add-On	Rate
Tailgate	+\$20–\$30/hr OR +\$0.60/km
Refrigerated	+25–35%
Crane / Hiab	\$280–\$350/hr (4-hr min)
After-hours	+20–30%
Weekend	+30–40%
Public Holiday	+40–50%
Waiting Time	\$120–\$150/hr

CLOX — FULL LOAD TRANSPORT ONLY (FTL)

What “Full Load Only” Means in CLOX App

- ✗ No courier / parcel / shared loads
- ✗ No per-pallet or per-carton pricing
- ☒ One sender = one vehicle = one job
- ☒ Vehicle is dedicated to that shipment

This is how real transport operators prefer to work.

⚙ HOW CLOX SHOULD USE THIS (Best Practice)

App Pricing Logic

- Metro jobs: Hourly + minimum hours
- Regional / interstate: Per km
- Instant quote: Show *range*, not fixed price
- Final price: Carrier confirms

PRICING RULES (IMPORTANT FOR CLOX)

- ✓ Dedicated vehicle only
- ✓ Minimum hours apply (2–4 hrs metro)
- ✓ Higher of hourly or per-km auto-applies
- ✗ No shared loads

- **✗ No per-pallet pricing**

**Carrier payout ≈ 70% of above rates
(30% Clox commission protected)**

CLOX – LOAD TYPES (CUSTOMER SELECTION)

☒ **GENERAL FREIGHT (DEFAULT)**

- Cartons
- Palletised goods
- Retail stock
- FMCG
- General merchandise

No special handling required

TEMPERATURE CONTROLLED

- Chilled goods
- Frozen goods
- Perishable food
- Pharmaceuticals

 Requires refrigerated vehicle

DANGEROUS GOODS (DG)

- Flammable liquids
- Flammable solids
- Corrosive substances
- Toxic materials
- Aerosols
- Batteries (Lithium, industrial)
- Gas cylinders
- Chemicals

Requires:

- DG-licensed carrier
 - Correct placards & paperwork
-

LIQUID / BULK LIQUID

- Drums
- IBCs
- Tanker loads
- Oils
- Paints
- Food-grade liquids

May require:

- Spill containment
 - Food-grade certification
-

HEAVY FREIGHT

- Machinery
- Engines
- Industrial equipment
- Mining equipment

⚠ Weight-critical

Often requires higher-capacity vehicles

OVERSIZE / OVER-DIMENSION

- Long steel
- Pipes
- Beams
- Structural steel
- Precast concrete
- Large equipment

⚠ May require:

- Flatbed / extendable trailer
 - Permits
 - Pilot / escort vehicles
-

STEEL & METAL

- Steel coils
- Steel plates
- Rebar
- Aluminium
- Metal sheets

⚠ Requires:

- Chains & restraints
 - NHVR load restraint compliance
-

TIMBER & BUILDING MATERIALS

- Timber packs
 - Plywood
 - Gyprock
 - Bricks
 - Roofing materials
-

PLANT & VEHICLES

- Forklifts
- Excavators
- Skid steers
- Cars
- Tractors
- Agricultural equipment

⚠ Often requires ramps or low loader

BULK / LOOSE LOAD

- Sand
- Gravel
- Soil
- Scrap metal
- Waste materials

⚠ Tip truck or walking floor

CONTAINERS (PORT / WHARF)

- 20ft container
- 40ft container
- Empty container
- Reefer container

⚠ Wharf access & time slots apply

FURNITURE & HOUSEHOLD

- Commercial furniture
 - Office fit-outs
 - Large items (non-removalist)
-

HIGH-VALUE / SENSITIVE

- Electronics
- Medical equipment
- Fragile machinery
- Controlled goods

🔒 May require:

- GPS tracking
 - Insurance confirmation
-

WASTE / RECYCLING

- Industrial waste
- Construction waste
- Recyclables

 EPA compliance may apply
